

Shareholders Update
For the period ending
August 31, 2015

The following is a brief overview of the current status of Western Sierra Mining for the period ending August 31, 2015. This summary of the period should be viewed in conjunction with the previous reports filed with the Pink Sheets, press releases, SEC filings and previous shareholder updates filed during the previous years.

Exploration of a New Direction.

In early 2014, Western reported that it was going to expand its exploration objectives (see “Shareholders Report March 31, 2014). Over the last 18 months, your company has evaluated several new projects. Some have been mining related and some have been projects looking to provide long-term financial stability.

The first phase of this expansion has been the acquisition of approximately 4000 acre feet of water rights valued by independent MAI appraisal at \$40,500,000. The objective of Western’s Water Expansion Plan is to both address the growing demand for water and to provide a base resource for Western’s expansion into areas other than mining.

The Global Hemp Group

In August of 2015, Western entered into a Letter of Intent with the Global Hemp Group (GHG) where in Western will provide the water and GHG will provide the technology to develop significant industrial products from the cultivation of Cannabidiol (CBD). The project is to transform the hemp seed into oil and protein powder for the food industry, and to process the straw into fiber and dust. The fiber would be further processed for the textile industry to supplement cotton and synthetic fibers currently in use. The recovered dust would be palletized for a variety of target markets. A further processed product will be presented to the medical industry

GHG is a publicly traded company headquartered in British Columbia with a base of operation Southern California and having a strategic partnership in South Africa.

Ongoing and New Projects

The Company is transforming its mining activities to concentrate on the sale of mines currently in the inventory of the Company. Several proposals have been rejected for a variety of reasons. We do continue to negotiate with a number of potential J.V. partners in an effort to initiate a project that would lead to a long term production program with Western as the operating partner.

We get many inquiries for our services for outside and independent property evaluations. However, revenues are extremely small since most of the projects being presented either have little merit, problems with ownership documentation or because environmental and permitting issues make the project uneconomical.

Reporting Status

Our financial and corporate reporting will continue to be filed at Pink Sheets.com as will any significant press releases for the present time. For additional information on GHG you may visit their website and their reporting information at Pink Sheets OTC GBHPF.
